Erica,

Here's our slightly modified shipping address (new zip code):

Attn: Mark Strynar and/or Andrew Lindstrom
USEPA Chemical Services Center
109 TW Alexander Drive
Building "E" Loading Dock, Rm. E-178
Durham, NC 27709

Thank you,

Andy

Subject: PFAS Fingerprinting Study - attachments -email #1

Hi Andy,

My Division Director, Ken Kloo informed us that EPA has approved the fingerprinting project. I don't have a copy of the letter yet., I will forward to you when I get it.

As promised, I am sending you some attachments, but the sizes are too big for one email.

- **Figures of sampling locations – EPA/NJDEP PFAS fingerprinting study. There are 2-3 impacted potable well locations close to DuPont that are not on the figures.**
- **Solvay groundwater data – Both summary table and lab report. Solvay did not use EPA Method 537 for groundwater sampling, only for the potable wells they sampled.**
- DuPont groundwater data – Only summary tables were submitted by DuPont. DuPont has agreed to sample for PFAS in potable wells within 2 miles of their facility.
- PDF version of a mostly updated GIS map showing public supply wells and private wells that have been sampled for PFAS. The legend only gives concentration ranges based on the color of the symbol.
